Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 4 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent no. 5,350,130 to Hitomi et al.

Hitomi et al disclose a spinning reel , comprising: a reel body 2, which is hollow inside, having an axle hole, a transverse hole (for the handle) and at least one opening (2c), wherein the reel body has a connection portion to couple the reel body to a fishing rod; a drive mechanism (6, 7, 8, 9, 10, 11) mounted inside the reel body 2 having an input portion 6 extending out of the reel body through the transverse hole, an output portion 13 running out of the reel body 2 through the axle hole and a guiding device 17 having at least a portion thereof received in the at least one opening 2c; a handle 1 coupled with the input portion of the drive mechanism to drive the drive mechanism to operate; a rotor 4 coupled with the output portion 13 of the drive mechanism to be driven by the drive mechanism for rotation; a spool 5 coupled with the output portion of the drive mechanism to be driven by the drive mechanism for reciprocation, and a cover 16 mounted on the reel body to shield the at least one opening 2c.

Allowable Subject Matter

Claims 1, 5 and 6 are allowed over the prior art of record.

Response to Arguments

Applicant's arguments filed September 9, 2004 have been fully considered but they are not persuasive.

In response to applicant's remarks regarding Hitomi's element 2c not constituting a guide device, it is respectfully submitted that nothing in the claims preclude element 2c from being a "guide device". What claimed structure differentiates Hitomi's guide device with the instant "guide device"?

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

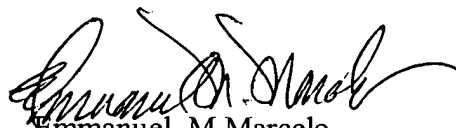

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
